SVM HR SEC SCHOOL  
Percentage - 80.6%

## PROFILE SUMMARY

Web developer with experience in developing components from design specifications, optimizing existing code, and improving performance. Skilled in writing maintainable code and building reusable features aligned with modern web development standards. Strong understanding of web concepts, clean UI design principles, and efficient development workflows.

## PROJECT

### Project - 1

#### Weather Reporting Application

( React.js, HTML, CSS, Online API)

- **Description:** Created a Weather Reporting Application to provide real-time weather updates for users.
- **Front-end:** Utilized React.js for a dynamic and responsive user interface, along with HTML and CSS for styling.
- **Functionality:** Integrated an online weather API to fetch and display current weather data based on user location or input.

### Project - 2

#### Silk Saree E-commerce Website (In Progress)

(SpringBoot , Vue JS)

- **Description:** Developing an e-commerce website for a silk saree business using Java Spring Boot and Vue.js. Features include product listings, categories, and UI built from Figma designs. Working closely with the client to refine the layout and functionality during development.

## EXPERIENCE

### Software Developer | Tectalik (Apr 2025 – Nov 2025)

- Developed backend features using Elixir. Built interfaces using Vue.js & Vuetify.
- Created and integrated REST APIs.
- Collaborated in Agile sprints, debugging, and UI improvements.

### Internship Web Developer | Nexcap (One Month)

- Gained experience in component-based frontend development and state management
